Different Types of Mobile Security Threats

OUR SOLUTION

Fort is an on-premises/on-device solution designed to secure Samsung devices on the highest level. Fort includes a combination of different static and dynamic procedures which are seamlessly connected to provide a complete end-to-end security solution, and at the same time provide the best possible user experience.

Fort is a unique propriety technology. It is based on years of hands-on mobile cyber security experience, of confronting attacks from lowest to highest risk levels, and providing protection for endpoints and data in the enterprise and security worlds

FortOne will make your Samsung device attacks-proof
